

ADAM ADEL

Computer Science Student | Full-Stack Web Developer

Cairo, Egypt | +20 102 348 4243 | adamadel3224@gmail.com | [GitHub](#) | [LinkedIn](#)

Computer Science student (AI major) with hands-on experience building and deploying full-stack web applications. Strong foundation in JavaScript, Node.js/Express, relational and document databases, REST APIs, and secure authentication.

EDUCATION

Bachelor of Computer Science, AI Major | Misr International University (MIU) | Sep 2024 - Jun 2028

Relevant coursework: Data Structures, Object-Oriented Programming, Analysis and Design of Algorithms, Introduction to Artificial Intelligence

TECHNICAL SKILLS

Languages: C++, Java, JavaScript (ES6), SQL

Web and backend: HTML5, CSS3, Node.js, Express.js, REST APIs, MVC

Databases: PostgreSQL, MongoDB, Mongoose

Tools: Git, GitHub, Railway, Cloudflare Pages, Supabase

SELECTED PROJECTS

Nuvanti | Full-Stack E-Commerce Store and Admin Platform | Independent project · Deployed | [GitHub](#) [Live store](#)

- Built and deployed an e-commerce storefront and protected admin portal with JavaScript, Node.js/Express, PostgreSQL, Cloudflare Pages and Functions, Railway, and Supabase.
- Implemented catalog and inventory workflows, customer orders, and checkout with Cash on Delivery, hosted Paymob payments, and manual InstaPay transfers; added transactional price and stock validation.
- Protected admin and customer flows with role-based permissions, revocable sessions, email verification, email-code login, and authenticator MFA; added secure order tracking and audit logs.
- Ran a browsing load test with 100 virtual users and an OWASP ZAP baseline scan of the public storefront.

PadelSync | Padel Court Reservation Platform | Four-person team · SWE230, MIU | [GitHub](#) [Demo](#)

- Built reservation features across the frontend and backend with JavaScript, Node.js/Express, and MongoDB/Mongoose; designed REST APIs and MVC data models for users, courts, and bookings.
- Prevented double bookings with a unique compound database index; implemented JWT authentication, bcrypt password hashing, and role-based access; deployed to Railway over HTTPS.

Inventory & Sales Tracker | C++ | *Academic project*

- Built a C++ console application for product and transaction tracking, using modular classes and object-oriented design.
- Used core data structures and file streams to persist product catalog and sales records between runs.

EXPERIENCE

Operations and Retail Management Assistant | Family-owned stationery and commercial supplies business · Cairo · Mar 2020 - Sep 2024

- Managed inventory across a broad product catalog and coordinated with wholesale distributors to balance stock with seasonal demand.
- Digitized daily sales tracking in Excel and supported cash reconciliation and audits of inventory discrepancies.
